HCI Work Breakdown Structure

HCI stands for Heavy Civil & Infrastructure Construction. The Cost Books & Master Estimate files are based on decades of experience estimating Heavy Civil and Infrastructure Projects in North America and around the world. These projects have included some of the largest infrastructure projects anywhere, including Bridges, Highways, Hydro Electric Projects, Tunnels, Light Rail Transit Projects and Transmission Lines.

The Master Estimates are organized to follow a Work Breakdown Structure (WBS) specifically designed by HCI for Heavy Civil & Infrastructure Construction. The structure follows a 10-digit multi-level drill down compatible with current estimating software. The resource rates, crews and estimate assemblies included with the HCI files follows this work breakdown structure.

Heavy Civil Infrastructure Work Breakdown Structure (WBS)

- 1. Site Preparation & Earthworks
- 2. Shoring & Tunneling
- 3. Sewer & Watermain
- 4. Foundations & Structures
- 5. Paving & Siteworks
- 6. Track & Catenary System
- 7. Power Distribution & Lighting
- 8. Mechanical Piping & Building Fit-out
- 9. Contractor Indirect Costs
